DOCS / FOOTBALL API FREE

Football API#

The football API is **free** — you only need a token (register here). It covers 30+ leagues with deep match data: live scores, statistics with xG and shotmaps, lineups, standings, head-to-heads, player stats, transfers, multi-bookmaker odds (pre-match) and model predictions.

```
Base URL:  https://sports.bzzoiro.com/api/v2/
Auth:      Authorization: Token YOUR_API_KEY
```
copy

Two versions exist. **Use v2** — it is the actively developed one. v1 (`/api/`) remains for existing integrations: v1 API (legacy).

Resources

AREA	ENDPOINTS	REFERENCE
Events & live	`/events/` , `/events/live/` , `/events/{id}/` + 12 sub-resources (stats, lineups, incidents, h2h, odds…)	Events & live scores
Leagues & seasons	`/leagues/` , standings, seasons, leaderboards, best XI, venues	Leagues, seasons & standings
Teams & players	`/teams/` , `/players/` , squads, fixtures, stats, transfers, World Cup squads	Teams, players & transfers
People & places	`/managers/` , `/referees/` , `/venues/`	Managers, referees & venues
Odds & predictions	`/odds/` , `/odds/best/` , `/bookmakers/` , `/predictions/`	Odds & predictions
Media	`/tv-channels/` , `/broadcasts/` , `/social/`	TV, broadcasts & social
Coverage	`/coverage/` — what every sport holds right now, in one call	see below

What is there to poll

`GET /api/v2/coverage/` answers, for every sport on the platform, whether it has fixtures ahead, how many of them are priced, and when the next and last events are. It needs no token. Worth one call before a polling loop decides what to ask for: hockey and basketball are out of season for months at a time, and their fixture endpoints can only answer that with an empty list.

```
curl "https://sports.bzzoiro.com/api/v2/coverage/"
```
copy

```
{"generated_at": "2026-08-19T17:44:40+00:00", "sports": [
  {"sport": "football", "status": "in_season", "events_next_7d": 527,
   "events_next_30d": 1911, "priced_next_7d": 439, "live_now": 0,
   "next_event_at": "2026-08-19T18:00:00+00:00",
   "last_event_at": "2026-08-19T17:30:00+00:00", "docs_url": "/docs/football/"},
  {"sport": "hockey", "status": "off_season", "events_next_7d": 0,
   "events_next_30d": 0, "priced_next_7d": 0, "live_now": 0,
   "next_event_at": null, "last_event_at": "2026-06-18T00:00:00+00:00",
   "docs_url": "/docs/hockey/"}
]}
```

copy

`status` is `in_season` , `between_events` , `off_season` or `no_fixtures` . Add `?sport=hockey` for one sport.

Quick example

ON THIS PAGE
- Resources
- What is there to poll
- Quick example
- Conventions
- Interactive reference
- Typical workflows

```
# Live matches right now
curl -H "Authorization: Token YOUR_API_KEY" \
     "https://sports.bzzoiro.com/api/v2/events/live/"
```

copy

Conventions

Pagination (`limit` / `offset` , default 50, max 200), UTC ISO-8601 dates, decimal odds and the uniform error shape are shared with every BSD API — see Conventions & limits. Hot endpoints (`events` , `leagues` , `teams`) are edge-cached ~5 s (`X-Cache-Status` header).

Interactive reference

- OpenAPI explorer — browse every endpoint and schema
- Swagger UI · ReDoc · raw schema at /openapi.json

Typical workflows

- Build a league page
- Get a player profile
- Live data via WebSocket (separate $3/mo addon)
